ABSTRACT

These proven 20-minute standards-based instructional lessons, organized by grade level, provide the resources needed to effectively teach library and information literacy skills to students in kindergarten through fifth grade. Based on American Association of School Librarians and Association for Educational Communications and Technology (AASL/AECT) standards and the Mid-continent Research for Education and Learning (McREL) benchmarks, each lesson plan includes: standards, learning objectives, teaching directions, reproducible worksheets and graphics, learning styles, teaching team, and related resources. The book provides the tools needed for fostering students' critical thinking, problem-solving, and decision-making skills while working toward the common goal of information literacy. Lessons can be modified to fit the individualized needs of teachers and students can be used for library classroom discussions or for student worksheets. Includes an index. (Contains eight references.) (AEF)
